Development of controls (Motion picture) University of Minnesota, Audio-Visual Education Service, 1959.

20 min., sd., b&w, 16 mm. (Understanding human behavior, no. 10)

Summary: Dr. Bernard C. Guenoc conducts a discussion about the adaptation approach to the development of control mechanisms, or conscience, and contrasts this concept with the classical Freudian description of the development of super-ego. Discusses the functioning of the control process, the development of reward and punishing, mental patterns, and the development of self-reward and pride. Describes some of the mechanisms of adaptation involved in the failures of the control mechanism and the relationship of these mechanisms to disturbed, anti-social, behavior.

Development of self-government, part 1: Rebellion in upper Canada (Filmstrip) National Film Board of Canada, 1961.

59 fr., color, 35 mm. (Canadian history series)

With manual.

Summary: Depicts the efforts that were made to unsettle the powerful family compact and to piece government in the hands of an elected majority. Sketches in the background to the events that culminated in the open revolt led by William Lyon Mackenzie. Describes the immigration of large numbers of people from the British Isles in the mid-1800's and the preferential land policies of the governing council which added to the hardship of the colonists; tells

how agitation for reform of these and other government policies grew into open rebellion of which Mackenzie seemed the natural leader, depicting some of the high points of his campaign. With captions.

Early care of the patient with a spinal cord injury (Motion picture) U. S. Dept. of the Army, 1960.
47 min., sd., b&w, 16 mm.
Summary: Portrays the early care of the patient with a spinal cord injury. Sallient teaching points cover: proper placement on litter; evacuation and transportation; surgery for open and closed wounds; skeletal traction for fractures of vertebrae; tracheostomy; relief of pain by tranquilizers and surgery; bladder care; bowel care; use of Stryker frame; skin care; heat stroke care; dietary care; physical medicine; and occupational therapy. Emphasizes the cooperative action of the whole medical team in the proper care of the patient.

McGraw-Hill Book Co.**The earth's crust (Filmstrip)** Society for Visual Education and Row, Peterson, 1962. Made by Society for Visual Education.

43 fr., color, 35 mm. (Earth science series: Rocks and minerals group)

With teaching guide. Correlated with Row, Peterson unit texts: The earth a great storehouse and Stories read from the rocks, by Bertha Morris Parker.

Summary: Examines the composition of the inner layers and outer crust of the earth; describes the possible origins of the molten material that we became aware of as lava, or as deposits of such materials below the surface layers of the earth; studies the formation of igneous rock; and traces the formation of sedimentary rock from durable animal structures and rock minerals deposited by water on the surface of the earth.

Society for Visual Education**The earth's diary (Filmstrip)** Society for Visual Education and Row, Peterson, 1962. Made by Society for Visual Education.

47 fr., color, 35 mm. (Earth science series: Rocks and minerals group)

With teaching guide. Correlated with Row, Peterson unit texts: The earth a great storehouse and Stories read from the rocks, by Bertha Morris Parker.

Summary: Shows how the shape, size, and relative land and water areas of North America have undergone changes, pointing out that mountains have formed and worn down, and that ice sheets and lava flows once covered great expanses and have left their traces. Studies the evidence of earth forms and fossils for clues to past history, and explores the evidences of glaciation, ancient seas, and volcanoes.

Edward Steichen (Motion picture) National Broadcasting Co. Released by Encyclopedia Britannica Films, 1958.

28 min., sd., b&w, 16 mm. (The wisdom series)
With teacher's guide.
Summary: Edward Steichen, an American photographer, looks back on his long career as an artist and as one of the leaders in the development of modern photography. He discusses the circumstances which led him into painting and then prompted him to abandon the palette for the camera, describes some of his experiences as a photographer, and gives his views on the role of the photographic artist as an interpreter of man's life and aspirations.

The end and the beginning (Motion picture) TV-Radio Workshop of the Ford Foundation. Released by McGraw-Hill Book Co., 1956.
30 min., sd., b&w, 16 mm. (Lincoln series)
Originally produced for the Omibus television program.
Summary: Depicts Lincoln at the White House at the time of Lee's surrender, as he tells of his forebodings of death. Shows his assassination at the theater and his death in the home of Mr. Peterson, where he was carried after being shot. Follows Lincoln's funeral train across the countryside to the accompaniment of a recitation of Walt Whitman's "When lilacs last in the dooryard bloomed." Includes flash-back scenes of the night when Lincoln was born.

tional Non-theatrical Events

End of the Dalton gang (Motion picture) CBS Television. Released by McGraw-Hill Book Co., 1957.
27 min., sd., b&w, 16 mm. (You are there)
Reduction print of the 35 mm motion picture made for the CBS television program You are there.
Summary: Reconstructs events of October 15, 1892, when the residents of Coffeyville, Kansas, rose up in arms against the attempt of the Dalton gang to rob the town's two banks, proving within twenty minutes that law and order was in Kansas to stay and virtually bringing to a close the reign of the outlaw gangs of the Old West.

Energy and work (Motion picture) Educational Services. Released by Modern Talking Picture Service, 1960.

29 min., sd., b&w, 16 mm. (Physical Science Study Committee course film)

Based on the textbook *Physics*, by the Physical Science Study Committee.

Summary: Professor Dorothy Montgomery shows that work, measured as the area under the force-distance curve, does measure the transfer of kinetic energy to a body, calculated from its mass and speed. She uses a large scale falling ball experiment, a non-linear spring arrangement, and a "Rube Goldberg" to establish graphically that work is a useful measure of the transfer of energy in various situations.

McGraw-Hill Book Co.

Exploring the ocean (Motion picture) Churchill-Wexler Film Productions, 1960.11 mm., ed., color, 16 mm.
Eastman color.
With study guide.

Summary: Correlated with Heath elementary science texts, by Herman and Nina Schneider. Points out that, though we have chartered the ocean's surface in detail, below the surface lies a part of the world that we are just beginning to explore. Uses animation to picture the ocean's floor, slopes, and continental shelves, and to explain how we explore by sounding and photography. Describes the ocean's plants and animals and explains how all life in the ocean depends on the thinnest forms of plant life. Discusses the ocean's vast storehouse of minerals and describes the part played by the water cycle in depositing these minerals.

Exploring your growth (Motion picture) Churchill-Wexler Film Productions in collaboration with D. C. Heath & Co. Released by Churchill-Wexler Film Productions, 1957.11 mm., sd., color, 16 mm.
Eastman color.
With study guide.

Summary: Correlated with the textbooks Science in Your Life, Science in Our World and Science for Today and Tomorrow, books 4-6 of Heath elementary science, by Herman and Nina Schneider.

Summary: Uses simple animation and photomicrography to explore the process that makes a person grow, explaining how food is digested in the mouth, stomach, and intestine; how the digested food is carried by the blood from the intestine to the cells of the body; and how food allows cells to grow and divide, causing growth.

Credits: Educational consultants, Germae Schneider, Nina Schneider.

National Educational Television Film Service**External cardiac massage (Motion picture)** Smith, Kline and French Laboratories, 1961. Made by Visual Projects.

23 min., sd., color, 16 mm.

Summary: Dr. James Jude, Dr. William R. Kouwenhoven, and Mr. Guy Knickerbocker of Johns Hopkins University explain the rationale for closed chest cardiac massage and resuscitation. Shows the technique in a laboratory demonstration and on a human subject in a simulated cardiac emergency. Uses animation to explain the physiology of the normal heart and circulatory system, and to demonstrate how the method of external cardiac massage circulates blood during cardiac arrest without the previous necessity of opening the chest. A few actual cardiac arrest cases and resuscitation are also shown.

1. Cardiac massage 2. Heart failure. I. Smith, Kline and French Laboratories, Philadelphia.

First aid. Part 3: Burns (Motion picture) U. S. Dept. of the Army, 1960.
14 min., sd, color, 16 mm.
Summary: Discusses and describes the symptoms of 1st, 2d, and 3d degree burns, and demonstrates the first aid measures to be taken when treating serious burn casualties. Presents first aid treatment of flame or hot liquid burn victims, emphasizing the need to minimize and prevent infection, apply sterile dressings to critical areas, treat for shock, elevate pain, administer salt and soda solution, and obtain medical aid. Demonstrates special first aid for treating white phosphorus burns, giving particular attention to flushing burned areas with water, applying copper sulphate solution, and removing phosphorus particles. Shows first aid treatment for acid or alkali burns, underscoring the importance of flushing burned area with water and obtaining medical aid.

The fluid dynamics of drag, part 1: Some curious experiments (Motion picture) Educational Services, 1960.

21 min., sd., b&w, 16 mm.

Correlated with the book entitled Shape and flow; the fluid dynamics of drag, by Ascher H. Shapiro.

Summary: Ascher H. Shapiro performs experiments to show that in a certain range of speeds the drag of a sphere decreases as the speed increases, that at low speed a smooth sphere has less drag than a rough sphere, but that at high speeds the reverse is true, and that streamlining reduces drag in air, but increases drag in glycerine.

Credits: Director, Quentin Brown; photographer, Abraham Morochnik; graphics, Peter Robinson; editor, Jack Kaufman.

Forces (Motion picture) Encyclopædia Britannica Films, 1961.

13 min., sd., color, 16 mm.
With teachers guide.
Summary: Presents a visual explanation of the scientific concept of forces—what they are, what they can do, and how they are measured. A series of demonstrations show that forces can sometimes change the shape of an object, that they can speed up or slow down a moving object, and that a continually applied force can make an object move in a curved path. Illustrates the effects of electrical forces, magnetic forces, and the force of gravity.

Forum at the United Nations, part 1 (Motion picture)

New York herald tribune, 1955. Released by NET Film Service.
30 min., sd., b&w, 16 mm. (The world we want; 1955)
Summary: Presents members of the New York Herald Tribune World Forum and forum director Helen Hiet Waller. After a greeting by U. N. Secretary-General Dag Hammarskjöld and a message by Harold E. Stassen, high school students from New York discuss with high school students from many foreign countries. The customs and the students discuss the topic "The roots of prejudice" and reveal that meeting delegates from other countries has done much to dispel many of the preconceived ideas which they had brought with them from their respective countries. The Japanese delegate concludes the discussion by suggesting that although the delegates have been much in contact, they have only understood the surface of each other's culture.

Frank-Hertz experiment (Motion picture) Educational Services. Released by Modern Talking Picture Service, 1961.

24 min., sd., b&w, 16 mm. (Physical Science Study Committee course film)
Based on the textbook *Physics*, by the Physical Science Study Committee.

Summary: Professor Hyron L. Yount uses a stream of electrons accelerated through mercury vapor to show that the kinetic energy of the electrons is transferred to the mercury atoms only in discrete packets of energy. Establishes the association of the quantum of energy with a line in the spectrum of mercury. Points out that the Frank-Hertz experiment was one of the earliest indications of the existence of internal energy states within the atom. Includes an epilogue by James Franck.

The frog (Motion picture) Encyclopædia Britannica Films, 1957.

11 min., sd., color, 16 mm.

Second edition.

Summary: Compares frogs with amphibians and their close relatives. Shows the life cycle of the frog—egg stage, development of embryo, and the development of the gill-breathing tadpole through all stages into an adult lung-breathing frog. Describes structural characteristics, life habits, habitats, enemies, and means of survival of the frog, and discusses its use as food, fish bait, and in science studies.

From ten to twelve (Motion picture) Canada Dept. of National Health and Welfare, Ottawa. Made by Crawley Films. Released by National Film Board of Canada, 1956.

Released in the U. S. by McGraw-Hill Book Co., 1957.
 26 min., ed., color, 16 mm. (Ages and stages series)
Summary: Discusses how the emotional and physical development of children from ten to twelve years manifests itself in their behavior, their attitudes toward their parents, their teachers, and each other. Shows the children of one family in various situations in the home, at school, and in group play, and explains that much of their confusing behavior is actually a normal part of their growing process.

Credits: Producer, Judith Crawley; director, Edmund Reid; scenario, Polly MacKay-Smith; photography, Thomas Gitan; film editor, Wanda Nowakowska.

Fundamental operations (Motion picture) University of Michigan Television, 1955. Released by NET Film Service.

30 min., sd., b&w, 16 mm. (Understanding numbers)
Summary: Analyzes modular arithmetic as an aid in understanding the principles of our own, or rational arithmetic. Through arithmetic modulo five, shows the closure, commutative, and identity-element principles of rational arithmetic. Identifies the additional associative and distributive arithmetic principles using our own arithmetic. Demonstrates that the two fundamental operations are addition and multiplication, that subtraction and division are the inverse of these operations, and that addition and multiplication tables, limited in size by place values, are required to perform fundamental operations. Features Dr. Philip S. Jones, professor of mathematics at the University of Michigan.

Fundamentals of carrier telephony. Part 1: Operation of a carrier system (Motion picture) U. S. Dept. of the Army, 1959.

12 min., sd., b&w, 16 mm.
Summary: Describes the features, operation, and advantages of the telephone carrier system used in today's modern Army; shows, by animation and drawings, how the telephone carrier system provides for simultaneous operation of several telephone or teletype channels over a single spiral wire cable. Using the AN/TTC-24 carrier terminal for demonstration, explains how different frequency bands are used in transmitting more than one voice over the transmission line at the same time, and describes in detail the transmission of messages from A to B terminals and B to A terminals. Emphasizes the advantages of the carrier system in terms of maximum operating efficiency and minimum expense.

The gateway to the West (Motion picture) Yale University Press Film Service, 1924.

36 min., sd., b&w, 16 mm., (The chronicles of America photoplays)

Based on the book The conquest of New France, by George M. Wright.

Summary: Shows how George Washington, as a colonel in Virginia, in the year 1754 helps to open England's eyes to the seriousness of France's ambitions to possess the vast wilderness west of the Alleghenies. Washington, sent by Governor Dittowide on his first important mission, protests the occupation of the Ohio Valley by the French, and makes his courageous stand at Fort Necessity.

Going to hospital with mother (Motion picture) Tavistock Institute of Human Relations, London. Made by James Robertson. Released in the U. S. by New York University Film Library, 1959.

45 min., sd., b&w, 16 mm.

With discussion guide.

Summary: Explains that the greatest single cause of distress in young children in hospitals is not illness or pain but separation from the mother. Shows how the staff of a British hospital has improvised a method of routinely admitting the mothers of patients under school age and giving them certain responsibilities in the care of their sick children. Follows the experience of a twenty-month old child and her mother to show how this method of care meets the emotional needs of the young child, contributes to the mother's high morale, and enriches the experience of the staff.

Gravity: how it affects us (Motion picture) Encyclopædia Britannica Films, 1960.

14 min., sd., color, 16 mm.

With teacher's guide.

Summary: Illustrates the importance of gravity, describing its action upon daily activities. Explains how it affects the earth and the universe, and how it would affect a human being on an imaginary trip through outer space. Film sequences are devoted to the gravitational studies and experiments of Galileo Galilei and Sir Isaac Newton and related sequences are used to explain the nature and effects of gravity.

Green Mountain legacy (Motion picture) National Life Insurance Co. of Vermont. Made by Bay State Film Productions. Released by Association Films, 1960.

29 min., sd., color, 16 mm.
Summary: Traces the pioneering spirit of the men of Vermont from the earliest colonial days to the present. Explains that Vermont's legacy to all men is a philosophy bred in the rugged hills that a man must do for himself, think a job through, do it once, and do it well. Discusses how this legacy is illustrated in the lives of Davenport who put electricity to work, of Thaddeus Fairbanks who changed the world's weighing habits, and of Doctor Dewey whose concern for the future of those left in isolated homes when a father or husband died led to the growth of the ninth oldest insurance company in the United States.

With teacher's guide.

Summary: An Indian teacher introduces a family descended from Mayans, explaining that the work, customs, and loyalties of the family are closely linked to the Indian civilization that existed centuries before. A manager of a large banana plantation describes the work of the plantation where farming is geared to profit and where all the advantages of the modern world are utilized. Points out that one of Guatemala's major problems is finding a way whereby these two different ways of living can be bridged.

Second edition of Distributing heat energy.

With teacher's guide.

Summary: Combines live photography with animated drawings to explain the nature of heat and some of the principal ways in which heat is transferred. Deals with such characteristics of heat as conduction, convection, and radiation; develops the concept of insulation; and illustrates and discusses practical applications of heat in home and industry.

Hiding behind the dictionary (*Motion picture*) KQED.

Released by NET Film Service, 1956.

30 min., sd., b&w, 16 mm. (Language in action)

Summary: Discusses and illustrates how dictionaries are prepared. Explains that the meanings of words are learned without using the dictionary, provides examples of how words are inferred from both physical and verbal contexts, and points out that a writer of a dictionary is a historian, not a lawgiver. Stresses the importance of being sensitive to language changes. Features Dr. S. I. Hayakawa of San Francisco State College.
